Jabuka je čvrsta, okruglo voće sa središnjom jezgrom, crvenom, zelenom ili žutom kožicom i bijelim ili žutim mesom.

Stabljika je vitka grančica koja povezuje jabuku sa stablom. Stabljika nosi hranu i vodu u jabuku

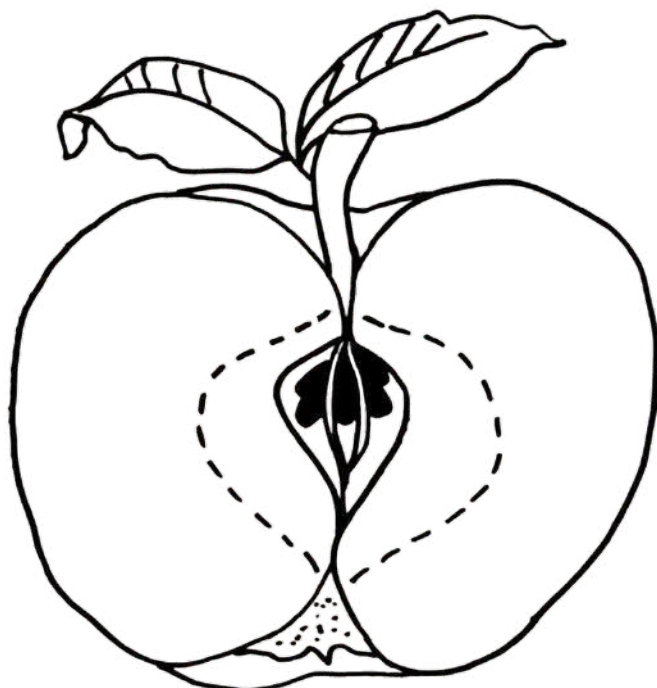

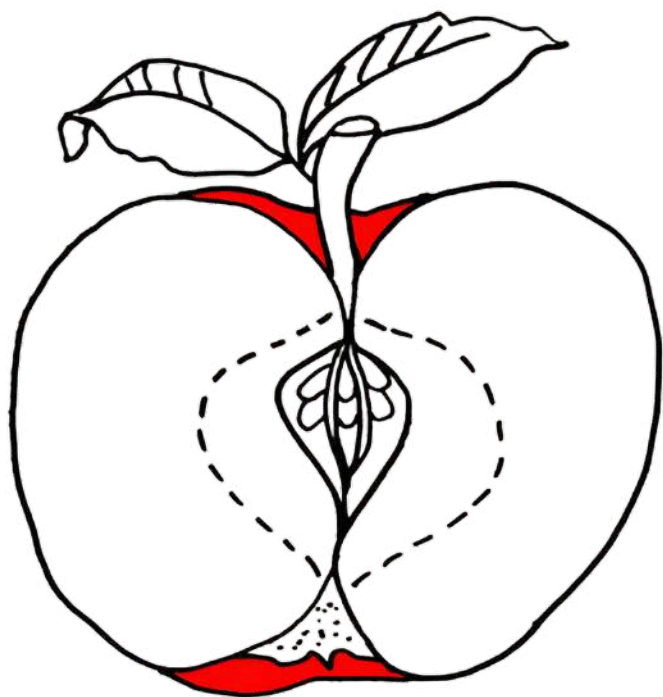

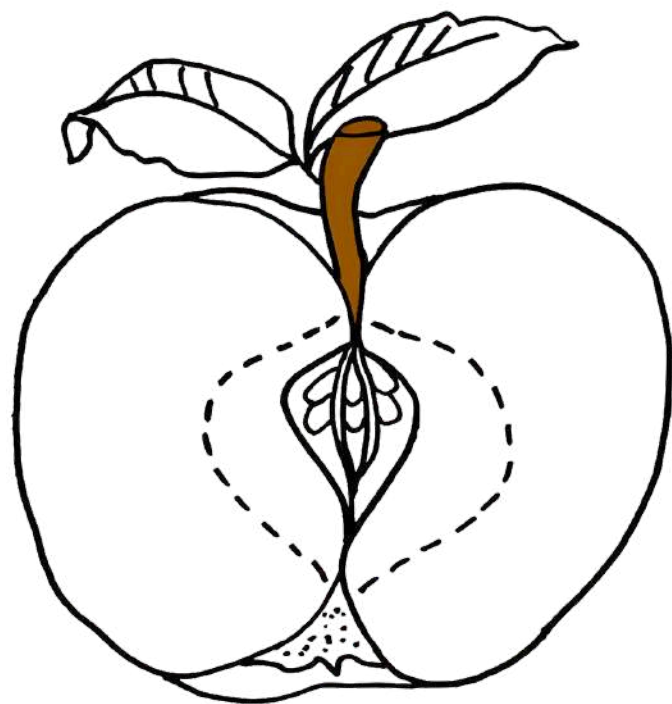

Kora je dio koji prekriva vanjsku stranu jabuke. Štiti unutarnje dijelove jabuke.

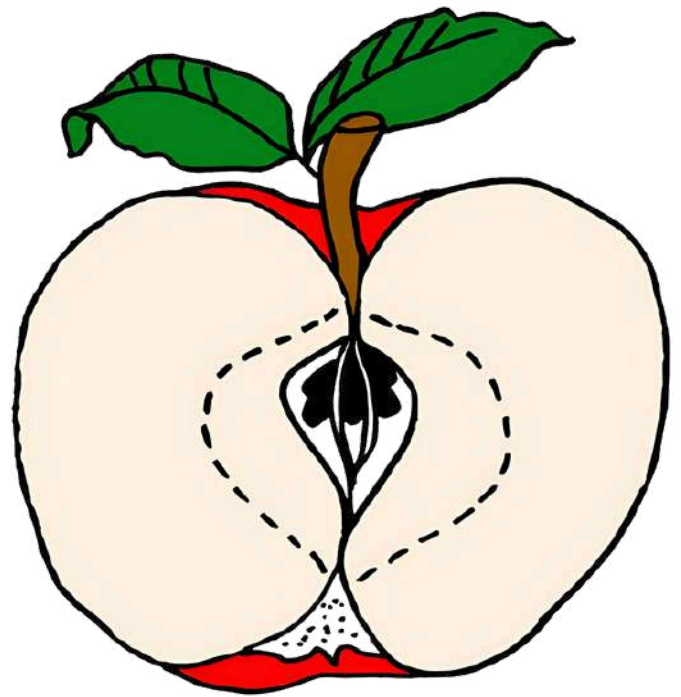

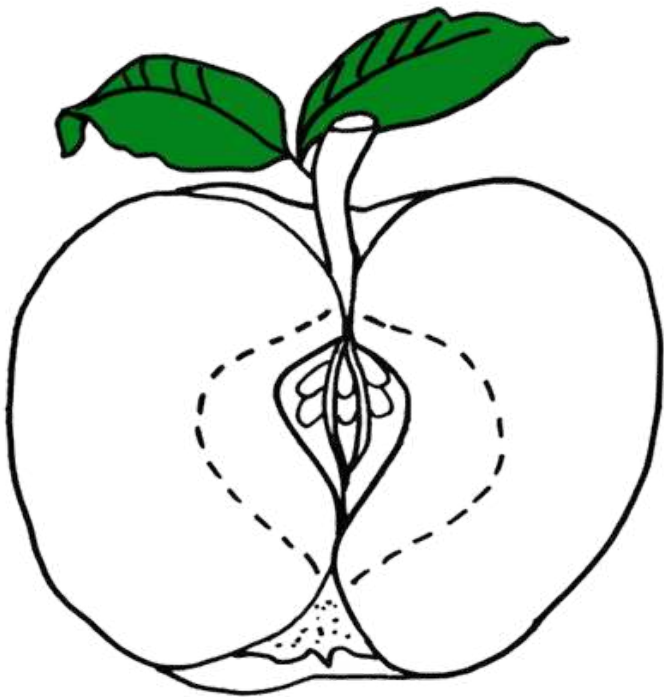

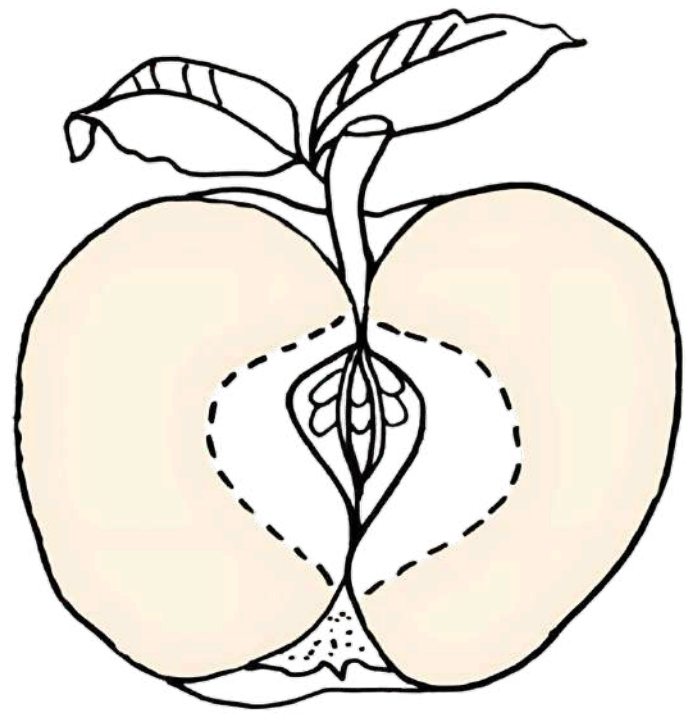

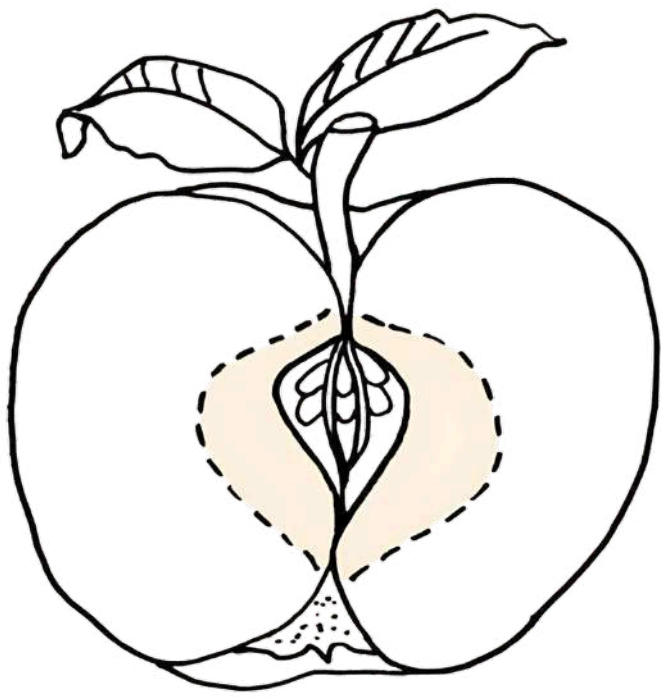

Sjemenke su male crne točkice unutar jezgre. Mogu izrasti u nova stabla jabuke ako ih posadite i brinete o njima.

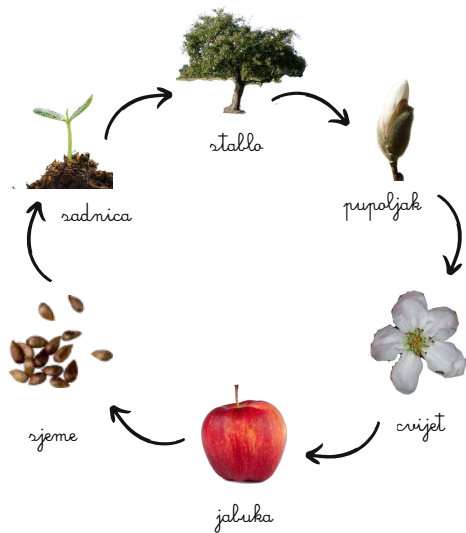

Jezgra je središnji dio jabuke koji ima sjemenkine džepove. Džepovi čuvaju sjemenke.

Pulpa je sočni dio jabuke koji se jede. Sočna je jer sadrži vodu.

Listovi su ravni, zeleni
dijelovi stabla koji
pokrivaju grane. Listovi
hrane jabuku kako bi mogla
rasti.

Naslorna kartica za
životni ciklus jabuke.

Životni ciklus jabuke
