

Migratory birds

“Why Do Some Birds Migrate to
Warmer Climates, and When Do
They Return?”

Montessori books and activities

Author: dr. sc. Carla Ronta

Every autumn some birds
travel.

autumn

They move to warmer regions.

warm regions

We call them migratory birds.

migratory birds

They return in the spring.

spring

The swallow is a migratory
bird.

swallow

It feeds on insects it catches
while flying.

insects

The Eleonora's falcon is a migratory bird.

Eleonora's falcon

It lives on the islands of
Cres and Krk during spring
and summer.

island

The reed warbler is a
migratory bird.

reed warbler

It moves to Africa during
the winter.

Africa

More than 100 species of birds leave Croatia every autumn.

Croatia

Some say that Croatia has the shape of a bird! What do you think?
