rep

Riba je vodena životinja koja diše pomoću škrga i ima tijelo prekriveno ljuskama. Kreće se pomoću peraja i repa.

Većina riba nese jaja, živi u rijekama, jezerima ili morima i ima važnu ulogu u ravnoteži prirode.

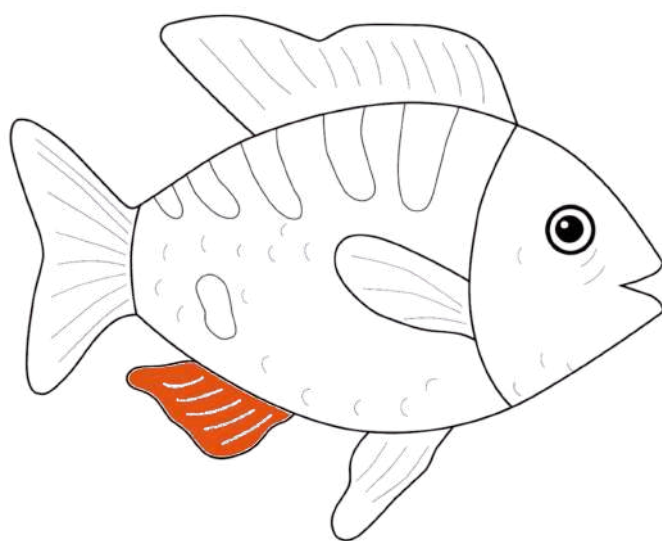

Glava je prvi dio tijela ribe i povezuje se s ostatkom tijela preko škrga. Glava ribe sadrži mozak, oči i usta.

Tijelo ribe prekriveno je ljuskama koje štite njenu kožu. U tijelu se nalaze svi važni unutarnji organi.

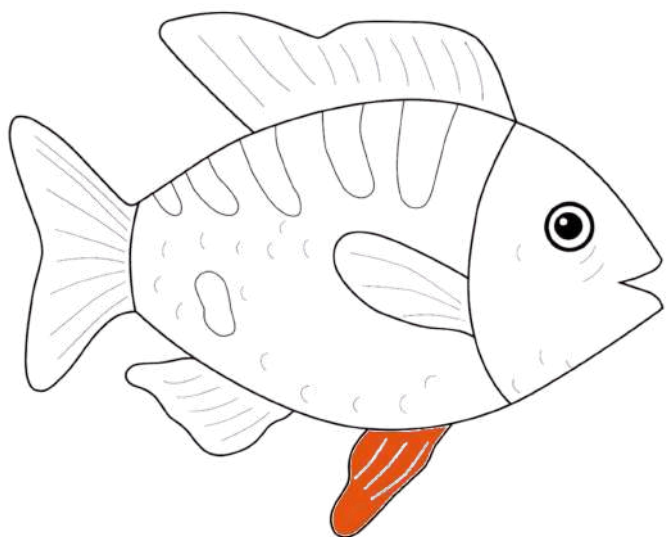

Rep ribi daje snagu za kretanje naprijed. Važan je za brzinu i smjer plivanja.

Prsna peraja pomaže ribi u kretanju naprijed, unatrag i u zaustavljanju.

Analna peraja održava ravnotežu dok riba pliva.

Trbušna peraja pomaže ribi da se podiže i spušta u vodi.

Leđna peraja pomaže ribi da ostane stabilna u vodi i ne prevrne se.
