**Arktički ocean** najmanji je ocean na svijetu. Nalazi se na krajnjem sjeveru Zemlje, iznad Sjeverne Amerike, Europe i Azije. Ovaj ocean je poseban zbog vrlo hladne klime. Tijekom cijele godine prekriven je morskim ledom, barem djelomično.

**Atlantski ocean** razdvaja Sjevernu i Južnu Ameriku od Europe i Afrike. Drugi je najveći ocean na Zemlji. Sadrži slanu vodu i zauzima oko 20 % Zemljine površine. Najdublja točka, Milwaukee Deep, doseže više od 8.530 metara.

**Indijski ocean** treći je najveći slani ocean na Zemlji. Razdvaja istočnu obalu Afrike od Indije i Australije. Najdublja točka Indijskog oceana je Sunda Deep, koja doseže dubinu od 3.950 metara.

**Žiki ocean** najveći je ocean na svijetu. Proteže se od zapadne obale Sjeverne i Južne Amerike do istočnih obala Azije i Australije. Ovaj ocean zauzima gotovo polovicu svjetske vodene površine. U njemu se nalazi i najdublja točka na svijetu, Marijanska brazda.

**Južni ocean** četrty je najveći ocean na svijetu, velik otprilike kao dvije Sjedinjene Američke Države. Nastao je 2000. godine odvajanjem južnih dijelova Atlantskog, Indijskog i Tihog oceana. Južni ocean okružuje Antarktiku.
